EXPERIENCE

Java Software Engineer

Picnic Technologies

Aug. 2023 – Present

Amsterdam, Netherlands

- Led integration of traditional search with LLM engine, resulting in up to 16% increase of conversion rate.
- Refactored the logic for recipe search and indexing to ensure that recipes are loaded from a single source of truth within the company.

Engineering Manager

Erness

Dec. 2022 – Aug. 2023

Limassol, Cyprus

- Led development and support of a corporate platform for omnichannel customer communications with strict requirements for latency and availability.
- Initiated migration of the communication service to event sourcing pattern, resulting in reduction of request latency from 400ms to 100ms on 95th percentile.
- Recruited and integrated highly skilled and experienced professionals, resulting in a stronger team.

Java Software Engineer

Revolut

Dec. 2021 – Sep. 2022

Moscow, Russia

- Led analysing, development and acceptance testing of Debit Card Overdraft product, a feature allowing customers to overdraw their debit card accounts up to a specified limit, preventing transaction declines. Ensured full compliance with legal requirements for the UK and EU markets.
- Designed the solution architecture for a set of features ensuring the bank's compliance with Regulation Z requirements set by the US Federal Reserve Board.

Engineering Manager

Raiffeisen Bank

Feb. 2019 – Jun. 2021

Moscow, Russia

- Led and managed team working on several Cash Management products. Built up from the scratch processes of analysing, development, testing and releasing features.
- Developed brand new system for handling corporate deposits. The system was built using microservice architecture, with close to real time Money Market quoting integration.

Big Data / Java Developer

DataArt

Apr. 2016 – Feb. 2019

Voronezh, Russia

- As a fullstack participated in development of e-commerce system, transitioned it to SPA front-end architecture.
- Developed Hadoop based datalake and ETL pipeline on Spark for one of the biggest pharmaceutical companies of USA.

Big Data Developer

AT Consulting

Aug. 2013 – Mar. 2016

Voronezh, Russia

- Developed Hadoop based datalake using Spark and MapReduce for industry leading telecom operator.
